1 Viz Pilot Edge 1.6.1

Release Date: 2020-07-10

These are the release notes for Viz Pilot Edge version 1.6.1. This document describes the user-visible changes that have been made to the software since release 1.6.0.

1.1 Changes And New Features

1.2 Fixed Issues

- High Resolution Previews of images stored on Graphic Hub have been fixed. (VPE-3326)
- Template sort is more reliable. (VPE-3291)
- < and > can be part of auto-generated data element names. (VPE-3337)
- Improved OpenSearch compatibility by supporting the indexOffset parameter. (VPE-3101)

1.3 System Requirements

1.3.1 Hardware

There are no known hardware limitations for Viz Pilot Edge, other than requirements stipulated by newsroom systems hosting the client.

1.3.2 Software

If running Viz Pilot Edge inside a browser, the following minimum requirements apply:

- Microsoft Internet Explorer 11 +
- Chrome 64 +
- Safari 11.0 +

1.4 Upgrading

When upgrading from a previous version of Pilot Edge, the previous version may still be presented by the host browser for a short time due to client side caching. To prevent this, clear the host browser cache. If you are using the default Internet Explorer host, open Internet Explorer, press **CTRL + SHIFT + DEL**, select *Temporary Internet files and website files* and click **DELETE**.

1.5 Important Notes

- If there are any issues with map fields when running in Microsoft Internet Explorer 11 +, remove *include all local sites not listed in other zones* and turn off *detection of intranet zones* in the IE11 policy settings. (VPE-2329)

2 Viz Pilot Edge 1.6.0

Release Date: 2020-05-28

These are the release notes for Viz Pilot Edge version 1.6.0. This document describes the user-visible changes that have been made to the software since release 1.5.1.

This release includes a major update of Template Builder.

2.1 Changes And New Features

- Added the ability to sort Templates by modification date. (VPE-3120)
- Added support for automated opt-in collection of anonymized usage metrics, if used with Pilot Data Server 8.5 or above. (VPE-2810)
- Auto-generated data element titles will now ignore "<unspecified>" values. (VPE-3003)
- Added support for native spellchecking in normalized text fields. (VPE-3287)

2.2 Fixed Issues

- MOS fields <description> and <mosAbstract> are no longer truncated to 128 characters. (VPE-3245)

  > **Note:** The auto generated title on save is capped at 200 characters. If a title generation string is specified, the 200 character limit does not apply. Director may still show truncated descriptions in the MOS playlist, as the Media Sequencer uses the <objSlug> field to populate the "description" attribute.

- Opening Viz One MOS objects without media now gives a dialog instead of an error message. (VPE-2486)
- Refreshing the data element list after clicking "Show more" now works properly. (VPE-3208)

2.3 System Requirements

2.3.1 Hardware

There are no known hardware limitations for Viz Pilot Edge, other than requirements stipulated by newsroom systems hosting the client.

2.3.2 Software

If running Viz Pilot Edge inside a browser, the following minimum requirements apply:

- Microsoft Internet Explorer 11 +
- Chrome 64 +

Copyright © 2020 Vizrt

- Safari 11.0 +

2.4 Upgrading

When upgrading from a previous version of Pilot Edge, the previous version may still be presented by the host browser for a short time due to client side caching. To prevent this, clear the host browser cache. If you are using the default Internet Explorer host, open Internet Explorer, press **CTRL + SHIFT + DEL**, select *Temporary Internet files and website files* and click **DELETE**.

2.5 Important Notes

- If there are any issues with map fields when running in Microsoft Internet Explorer 11 +, remove *include all local sites not listed in other zones* and turn off *detection of intranet zones* in the IE11 policy settings. (VPE-2329)

2.6 Known Issues

- Graphic elements in timelines created using the Pilot Edge plug-in in OpenMedia do not appear in Director's MOS playlist. (VPE-2193)
- In Octopus 8, images of 4K resolution and above are not supported due to memory constraints. (VPE-2412)
- In Octopus 8, keyboard navigation via TAB does not work reliably due to constraints in Octopus. (VPE-2615)
